

EXECUTING TEST IN MVP FLOW

```
fun <View> Presenter<View>.withFlowOn(
    view: View,
    function: View.() -> Unit) {

    attachView(view)
    start()
    function.invoke(view)
    detachView()
}

presenter.withFlowOn(view){
    it("should add suggestions to view") {
        verify(view).addDestination(givenDestination)
    }
}
```

VIEWMODEL

```
abstract class ViewModel {  
    protected fun onCleared() {}  
}
```
