

# SPECIFICATIONS

- test + specification -> system documentation
- helps you understand product better
- fits great with TDD
- fits great to BDD
- separates **implementation** from **behavior**

```
class AuthenticationSpecification : Spek({  
    given("authentication module") {  
        on("first login ever") {}  
        on("login when user exists on device") {}  
    }  
})
```
